NFPA Compatible Cylinders At Their Best

Festo Corporation Mission

Enhance the business success of our customers by providing cost-efficient automation solutions with innovative products and services.

We accomplish this through:

- The commitment and conduct of our team members
- Allocation of capital
- Continuous improvement of internal processes
- Product innovation with reliability
- Application knowledge

The DNA Cylinder Series

- NFPA Interchangeable
- Superior Quality
- A Step Ahead

The slim, modern NFPA Cylinders from Festo are flexible and very economical. They serve the requirements of today's and tomorrow's demands for efficient and dependable linear pneumatic actuators.

In addition, Festo's extensive worldwide network is unparalleled, and service can be provided anywhere around the globe.

The Solution for Your Pneumatic Actuator Requirements

The DNA Actuator

Long service life is a required feature in today's and tomorrow's industrial environment. A cylinder made for demanding applications does not need to be bulky and heavy. Current technology and Festo's renowned experience in the field of pneumatic actuator design has resulted in the development of a versatile, economical and tough cylinder for applications in many industries.

Festo took the challenge; we designed and built a cylinder based on these requirements. The result is the DNA cylinder which exceeds our own benchmark specifications, and is compatible with the NFPA Standard.

DNA cylinders are rugged, state-of-the-art actuators for OEMs and end users. Install DNA cylinders in your machine or process operation and downtime is a thing of the past!

- Extruded aluminum barrel for light weight. Integrated sensor grooves achieves a space-saving design.
- Popular and universal proximity sensors, also used for a wide variety of Festo cylinder types – reduces inventory and spare parts.
- Roller burnished piston rods and threads for superior service life.
- Made to order – fast delivery

- Built-in adjustable cushioning screws (optional) and port connections (same face) on both end caps – more convenient accessibility.
- Wide variety of mountings are factory assembled or supplied separately – no need to stock all cylinder variations.
- Innovative mounting attachment system simplifies configuration of desired mounting styles – saves disassembly time whenever changes are made.

NFPA Standards

DNA series square head cylinders meet the mounting, rod, bore and thread dimension specifications as described in the following NFPA documents:

- ANSI/B93.8-1968[R1992]/
NFPA T3.6.4-1967
- Bore and rod size combinations and rod end configurations for cataloged square head industrial fluid power cylinders.
- ANSI/[NFPA] T3.6.7R2-1996
- Mounting dimensions, fluid power systems and products, square head industrial cylinder.
- ANSI/B93.29M-1986/
NFPA T3.6.8M R1-1984
- Accessory dimensions for cataloged square head industrial types, fluid power systems, cylinders.
- NFPA T3.6.17-1971[1990]
- Port nominal pipe sizes for merged inch and metric series cataloged square head industrial pneumatic fluid power cylinders.

Key Features

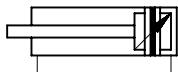

DNA-...-P-A

Square Head Industrial Cylinders

- **Bore Sizes:** 1½" ... 5"
- **Stroke Lengths:** ½" ... 80"

DNA-...-PPV-A

Two Basic Models

- Double-acting standard cylinder for non-contact end-position sensing (A) with flexible end position cushioning (P)

Example: DNA-...-P-A

- Double-acting standard cylinder for non-contact end-position sensing (A) with adjustable end-position cushioning (PPV)

Example: DNA-...-PPV-A

■ Standard cylinders are NFPA interchangeable.

■ DNA NFPA cylinders can be ordered as a standard component (without variants) or as a product module (assembled with selected accessories).

Cylinder Variations

S1: Reinforced piston rod

K3: Piston rod with female thread
(NFPA style SF; short female)

S2: Double-ended piston rod

K5: Piston rod with special thread
(NFPA style IM; intermediate male)

K0: Piston rod without thread
(NFPA style PL; plain)

K8: Extended piston rod

K2: Piston rod with extended
male thread

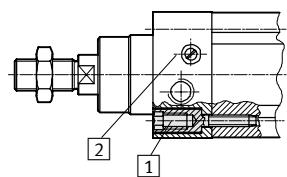

S6: Heat-resistant seals, max. 302° F

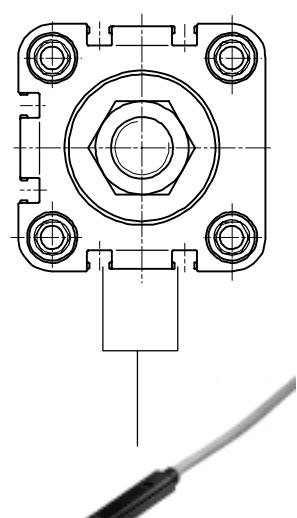

Note: Standard cylinder comes with small male thread (NFPA style SM; short male)

Key Features

- Allen screws with internal threads for mounting NFPA accessories **[1]**

- Internal mounting SME/SMT-8 cylinder sensor (no brackets or hardware required)

- Additional cushioning rings on the piston and adjustable air cushioning **[2]** is available for absorbing the residual energy from high speeds and machine cycles

- No protruding sensors - low profile sensors mount flush in grooves

- Space Savings

- Slot covers protect sensor cables and form smooth surface

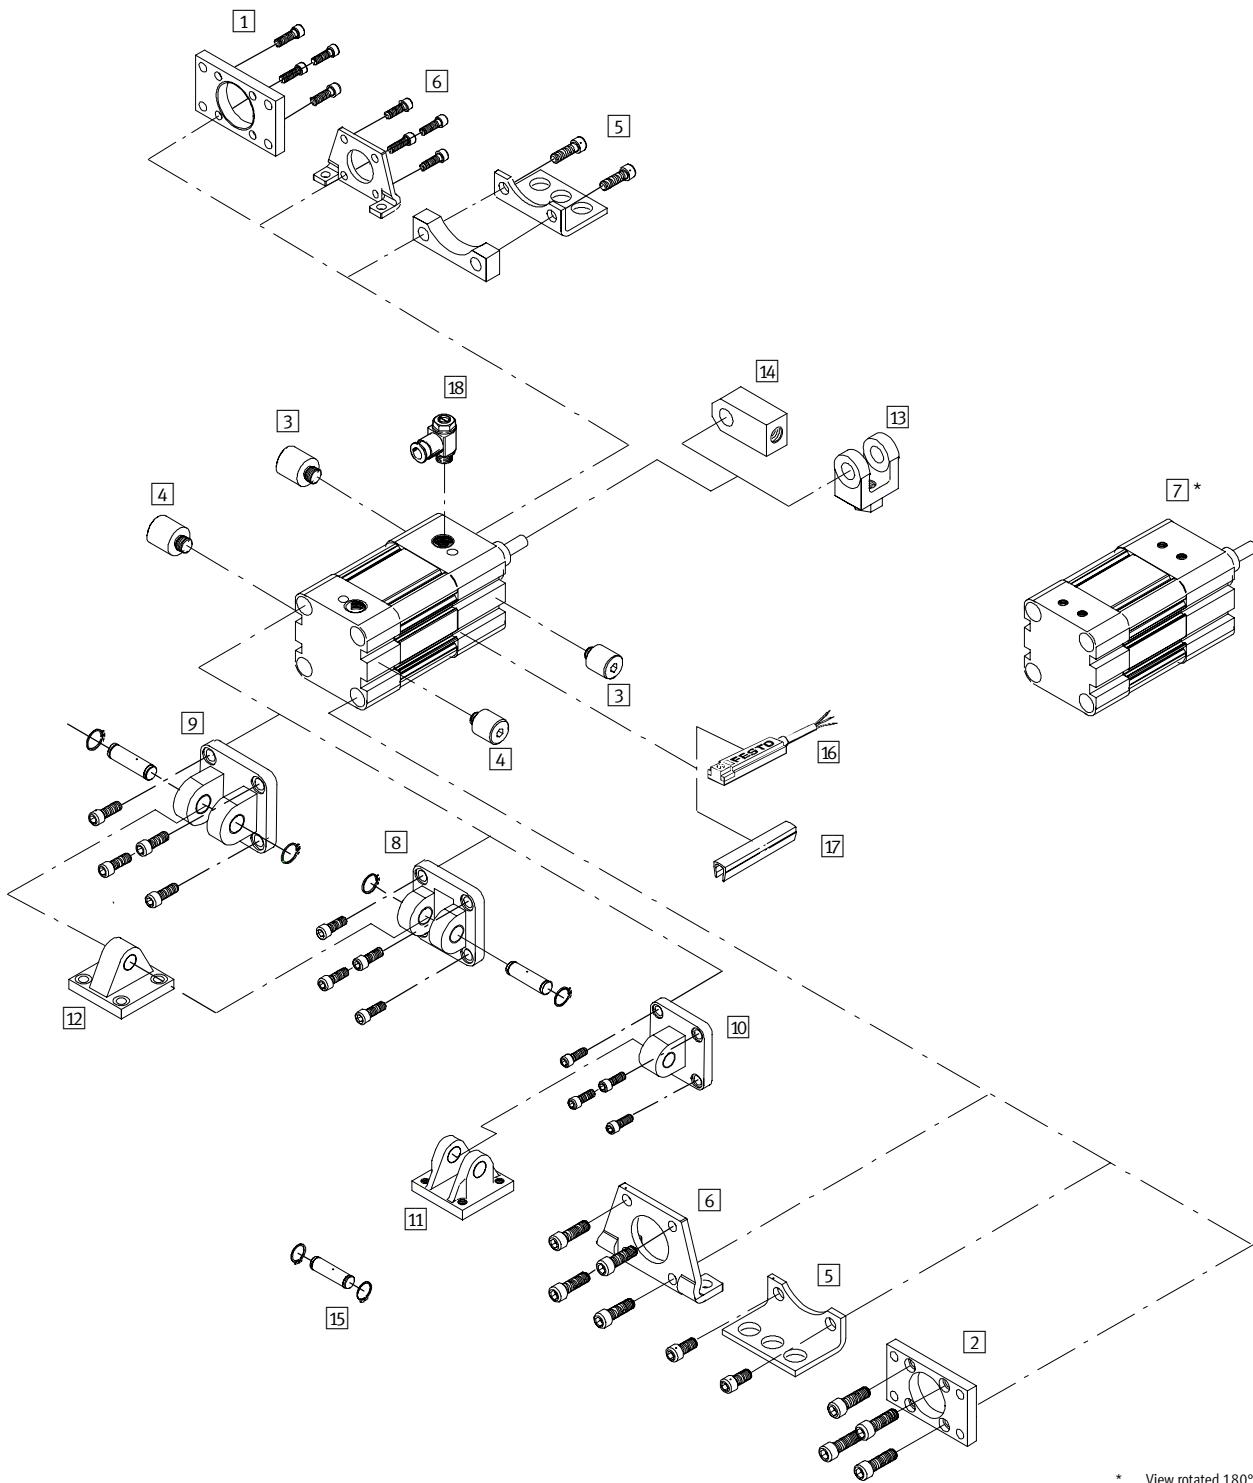

- A broad range of accessories are available

Ordering Example

The procedure for constructing the correct order code consists of 2 steps.

Step 1

Determining if a permissible cylinder variation combination is available:

The desired cylinder variations in this example are S2, K3, K8, S6, and MF1. Arrange these variations in sequence as they appear from top to bottom in the "Desired Cylinder Variation" column from the table on the right.

Once you have determined that all of the desired cylinder variations are available in combination, choose the mounting style. Furthermore, make sure the required bore and stroke are also possible, then proceed to step 2.

Step 2

Create an order code:

Use the example below and the "Order Code Table" as your guide. When you have chosen your desired configuration, transfer the code to the bottom of page 9. This is your order code.
