

SOLUTIONS

... For Ceramic Impact Pads

New Design Advantage... Tiles Won't Pop Out!

- ◆ non-corrosive.
- ◆ outlasts other lining materials up to **30** times, protects impact areas from: limestone, cement, coal, gypsum, gravel, grain or any abrasive material.
- ◆ the ceramic is mechanically fastened to the urethane so the tiles do not pop out as with other ceramic linings.
- ◆ premium wear resistant urethane acts as a cushion to absorb energy.
- ◆ easy to install with customized studs or weldable plugs.
- ◆ customized sizes to fit any job.
