

The Series PDPS's large diameter diaphragm and snap action switch make it dependable and ideal for OEM applications. The Series PDPS Pressure Switches are available for pressure, vacuum, and differential applications and are factory preset for pressures from $0.07^{\prime \prime}$ of w.c. to $1.0^{\prime \prime}$ of w.c. with full-scale repeatability of $\pm 0.02^{\prime \prime}$ of w.c. Other features of the PDPS pressure switch include standard multi-barb port connections, inherent mounting and quick disconnect terminals, which make the Series PDPS perfect for many OEM applications.
