Description

Max-Trak™ is an industrial mass flow controller from the company that has been a trusted name in industrial thermal mass flow meters for decades—Sierra Instruments.

In applications where frequent wash-down / hose-down is required, such as food and beverage, chemical processing, pharmaceutical and biotech, Max-Trak™ outperforms the competition as it conforms to the rigorous requirements of NEMA 6 and IP67.

Excellent accuracy and reliability coupled with unsurpassed instrument stability result from a patented, inherently linear design, advanced platinum sensor technology and a valve that is strong and forgiving of variations in process conditions.

Max-Trak™ measures and controls gas mass flow from 10 to 1000 SLPM, with lower flows (to 2 SLPM) and higher flows available upon request. Based upon Sierra's successful Smart-Trak® line of digital instruments, Max-Trak™ also offers Dial-A-Gas® multi-gas capability, both analog and digital communication and a wide variety of field adjustable parameters.

Max-Trak™ delivers the performance, flexibility and value you expect from Sierra Instruments.
