

SpiralVeyor® SV *A new generation of elevators*

Cartons / boxes / bags

Totes / containers

Trayless bottle packs

Parcels / poly bags

Trayed products

SpiralVeyor® in general

- Continuous elevator / buffer system
- Space-saving design
- High rate of throughput
- Accumulation by indexing
- Patented roller design

Bottling & Canning

Postal / Distribution

Pharmaceutical industry

The introduction of the AmbaFlex SpiralVeyor® SV in the mid nineties sparked a revolution in material handling. Paired with a simple and robust design, the space-saving configuration provides an effective solution to the traditional issues associated with height differences. The lateral roller system patented by AmbaFlex is simple and reliable, and it renders controls and sensors superfluous. The continuous motion represents a solution for the exacting situations involved with unstable products and high production speeds. With its installed base of exceeding one thousand machines world wide (including demanding multinational clients), the AmbaFlex SpiralVeyor® SV sets the standard for industry.

- Belt speeds of up to 90 m/min.
- Angle of incline 2.5° - 18°.
- CE certified and 100% intrinsic safety.

Distinguishing features:

- Only one drive needed for height differences exceeding 12 m.
- A choice of many belt types, flights and high friction ratios.
- Belt maintenance without using tools.
- Buffers up to 70 m belt length with only one drive.

Technical specifications:

- Material configurations: Mild steel, coated / high corrosion resistant / stainless steel wash down (100% stainless, no soft metals used).
- Elevation up or down (or reversible).
- Loads of up to 50 kg/m .

- For wider belt configurations we refer to our SpiralVeyor® SVX.
- For smaller belt width or mass flow application we refer to our SpiralVeyor® SVM.
- For conveying of unpacked products we refer to our SpiralVeyor® SH.
