

# GLOCALSOURCE

## FROM MOLDED DIMENSIONS

Built around our outstanding technical leadership and our commitment to customers, Molded Dimensions offers **GlocalSource** - a service of **providing product from world wide manufacturers supported by MDI's local technical service and support.**

"We developed **GlocalSource** so that, as a manufacturer, we can tap into the vast capabilities of other manufacturers around the globe and increase our value to our customers."

Mike Katz, President

Components that require sourcing abroad can now be procured with confidence - thanks to MDI. With MDI's **GlocalSource** you get global reach from a manufacturer with more than 50 years experience in the elastomer business.

### GlocalSource works for you because...

#### We know rubber compounding.

- Benefit from our extensive knowledge of rubber material.
- Know that every shipment of parts is certified and tested, including FTIR spectrometer analysis.
- Recognize the value of every shipment being tested per ASTM procedures to assure quality.

#### We help you design for manufacturability.

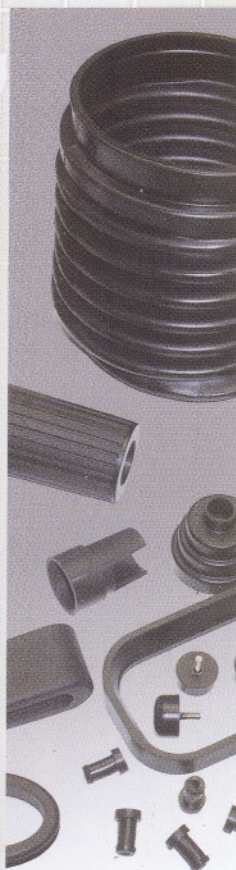

- Utilize our Engineering expertise for assistance with part design.
- Be aware that our Engineering staff controls tool design.
- Understand our goal is a robust design that decreases costs and increases sustained quality over the product life.

#### We provide local production capabilities if the need arises.

- Have confidence that if an unexpected event arises, MDI can mold parts in our US facility - ensuring the least amount of delivery interruption.
- Feel satisfied that the risk is reduced.

#### We do the sourcing and provide the logistics.

- Trust that the manufacturer is qualified to MDI standards.
- Be confident, knowing that all logistical details are handled by MDI.

The Future

The Mission

Technical Leadership

Partnership

Full Service Resource

*Global Reach with Local Service*  
... to help you win!

**GlocalSource** is another valuable aspect of Molded Dimensions -- consistent with our Mission to:

- Manufacture products that exceed your expectations,
- Be predictable and consistent, responsive and reliable, and
- Continually improve our processes.

Each factory that becomes part of the **GlocalSource** program is reviewed by MDI to ensure their capability to produce product consistent with MDI's high standards and our customers needs. Factories are reviewed for:

- Manufacturing capability, including rubber to metal bonding
- Material control
- Quality policy and procedures
- Tooling manufacturing capability

With **GlocalSource**, MDI utilizes **in-country representation** to assure success with each and every project from initial tool order and samples to the delivery of production orders.

Beyond the benefits of our technical services, **GlocalSource** provides for logistical details.

- Shipping, documentation, and all other importing functions are managed by MDI.
- Inventory is held locally for frequent shipment - decreasing your inventory and increasing your inventory turns, or...
- Product is drop shipped to your specific location for convenience.

**GlocalSource** - A unique solution to sourcing a product abroad, but needing local support. No one else can provide the experience of 50 years of engineering and manufacturing elastomeric products, full service, and the necessary global reach. You experience MDI expertise and support with product delivered to your location just as if it came from our factory.

**We are proud of our GlocalSource program and ready to put it to work for you.**

**When the situation arises that you need to source a product abroad, do it with confidence. Do it with GlocalSource.**

**Molded Dimensions**
