SPECIFICATIONS

SYSTEM MODEL 5150 - Cat # 315150

Includes the following units: MODEL 5502 - Cat # 303102
 MODEL 5008 - Cat # 303100 MODEL 5503 - Cat # 303103
 MODEL 5200 - Cat # 303101 MODEL 5504 - Cat # 303104

Model 5150 Keylock Video Conference Room Secure Switching System

“NON-SECURE” Mode (Key in DATA PASS position)

In this mode, the Electro Standards Laboratories' Model 5150 Video Conference Room Secure Switching System passes the connection of copper and fiber voice and data lines from the conference room equipment to the building data network.

“SECURE” Mode (Key in OFF-LINE position)

In this mode, the Model 5150 Video Conference Room Secure Switching System disconnects the same set of lines from the building data network, isolating all of the conference room equipment, completely.

Installs in a snap in a 19" rack!

System Model 5150 shown above

Model 5008 Display Indicator

Model 5200 Fiber Optic Switch

Model 5502 Ethernet Switch
