## Telephone / Telecom Test Kit

Test Kit contains thirteen high quality cables designed to facilitate test and access of high speed data interfaces.

Electro Standards Laboratories manufactures a complete selection of telephone/telecom patch cables that are compatible with all standard telephone systems, data and voice test equipment, and patch/interconnect devices. All of the cables are of the highest quality, manufactured in U.S.A. Custom designed cables utilizing these standard connectors are also available.

- **Test Kit contains thirteen cables designed to facilitate test and access of high speed data interfaces.**
- **All cables are packaged in a handy Test Kit Carry Case for maximum protection.**
- **Includes an information manual delineating each cable configuration.**
- **Custom-design cables and Custom-content kits available to suit your specific needs.**
