

SCRAP PREHEATERS/ DRYERS

Scrap Preheaters/ Dryers

Stelter & Brinck, Ltd. **scrap preheaters** dry and preheat simultaneously. These units are designed to fit on top of material conveyors designed for use with a preheater. These units are completely self contained and feature high turn down, high velocity burner systems to provide high air flow rates for drying and high energy to drive the heat into the load. Stelter & Brinck scrap preheaters provide increased throughput by supplying a hot charge for melting.

SOW EQUIPMENT

Sow Dryers/ Preheaters

Stelter & Brinck aluminum **sow dryers/ preheaters** are available in two versions; a lift-off portable unit that can be moved to new plant locations with ease and a dual station, fixed location model. Both models are custom designed to fit your sow geometry and load requirements. Sow dryers provide a dry charge and the production advantages of preheating.
