B

BATTERY SOLUTIONS

Our battery enclosures work in places we've never been.

The surface of Mars, below the Earth's crust and inside the human body, just to name a few.

SEAMLESS BATTERY SOLUTIONS

No tooling charges on standard sizes.

If your technology depends on a case to perform reliably, even in the most demanding environments, it's time to look at deep drawn battery enclosures.

- No tooling charges on catalog orders – 15,000+ standard shapes & sizes
- Cylindrical deep drawn enclosures – standard & non-standard
- Prismatic deep drawn enclosures – including stainless steel & titanium
- Covers/headers with secondary machining operations
- Manufacturability & design solutions
- Reduce leak & weld issues
- Prototypes to high-volume production
- Finite Element Analysis (FEA)
- Test lab resources
- Global sourcing
- Project & supply chain management
- Environmentally-sound aqueous cleaning system
- ISO 9001:2008, 13485:2003 and 14001:2004 Certified

Hudson Technologies, a business of JSJ, manufactures battery cases for implantable medical devices, aerospace, aviation, military, hybrid electric vehicles and other industrial and commercial applications.

When your technology depends on a precision metal enclosure or diaphragm, depend on Hudson Technologies

Automotive • Aviation • Aerospace • Commercial Battery • Implantable Medical Devices
Irrigation • Relay Cases • Semi-conductor • Mechanical Seals • Edge Welded Bellows
